| Overview | Agenda | Price | Speaker | Venue |

Computer Systems Validation (CSV) also known as Software Validation is all-pervasive in the Life Sciences Industry. It is a requirement of all the predicate rules, as well as 21 CFR 11 and Annex 11. However, unless one knows how to implement CSV, it is often very hard to detect the requirement for CSV, and very hard to determine what needs to be done, to meet domestic and / or international regulations or business continuity requirements. In addition, the FDA has stepped up 21 CFR 11 inspections that include CSV.
