Overview :

This seminar will be addressing how practice/business managers (or compliance officers) need to get their HIPAA house in order before the imminent audits or (even worse) litigation occurs against your organization under state laws of negligence.

It will also address major changes under the Omnibus Rule and any other applicable updates for 2017. Areas covered will be texting, email, encryption, medical messaging, voice data and risk factors as they relate to IT.

The primary goal is to ensure everyone is well educated on what is myth and what is reality with this law, there is so much misleading information all over regarding the do's and don'ts with HIPAA - I want to add clarity for compliance officers

I will uncover myths versus reality as it relates to this very enigmatic law based on over 1000 risk assessments performed as well as years of experience in dealing directly with the Office of Civil Rights HIPAA auditors.

Why you should attend:

There are major changes to HIPAA set forth by the Federal government whereby patients can receive remedies for HIPAA violations and business associates (i.e. law firms) must now comply directly with HIPAA

Omnibus has changed the HIPAA landscape for good!

State laws are now in place increasing liability for patient remedies!

THESE DAYS THE TRIAL ATTORNEYS ARE MORE DANGEROUS THAN THE FEDERAL GOVERNMENT!!

This once rarely enforced law has changed and you need to know what's going on!

Protect your practice or business!

Why are the Feds enforcing after all these years?

We will be discussing some of the changes taking place in Washington with the Health and Human Services in regards to the enforcement of the HIPAA laws already on the books.

I will also thoroughly go through multiple litigated cases I have been a part of involving patients suing for HIPAA
